Publishing Information

The *California Safe Schools Assessment 1998-99 Results* was developed by California Safe Schools Assessment (CSSA), which is a partnership of Butte County Office of Education, Duerr Evaluation Resources, and the California Department of Education. This publication was edited by Faye Ong, working in cooperation with Jean Scott and Jerry Hardenburg, Consultants, Safe Schools and Violence Prevention Office. It was designed and prepared for printing by the staff of CDE Press, with the cover and interior design created and prepared by Paul Lee. Typesetting was done by Carey Johnson. It was published by the Department of Education, 721 Capitol Mall, Sacramento, California (mailing address: P.O. Box 944272, Sacramento, CA 94244-2720). It was distributed under the provisions of the Library Distribution Act and *Government Code* Section 11096.

EXECUTIVE SUMMARY

California Safe Schools Assessment (CSSA) is the school crime reporting system implemented by the California Department of Education in accord with the California *Penal Code* Section 628 et seq. All California public schools, school programs, school districts, and county offices of education are required to collect and report incidents of school crime as defined by CSSA. The purpose of CSSA is to provide objective information for local and state school officials to use in assessing the safety of public schools in California.

The California Department of Education is required to prepare a summary report of the CSSA data and submit it to the California State Legislature by March 1 of each year for the previous school year. This is the fourth annual report to the legislature.

This report contains data collected for the 1998-99 school year and includes comparison data from previous school years. The data on incidents are presented as the total number of incidents in each crime category and as crime rates (i.e., the number of incidents per 1,000 students enrolled). Comparisons are made of *crime rates* and not of the total numbers of incidents because the rates reflect the changes in student enrollment from year to year.

The comparison of the 1998-99 CSSA data with the data from previous years reveals the following information:

- ▶ Trend analysis results vary. Incidents of Property Crimes continued to decline from previous reporting years, while incidents reported in the Crimes Against Persons and Drug and Alcohol Offenses categories increased slightly. Incidents reported in the Other Crimes category increased for the second consecutive year.
- ▶ Of all reportable incidents, bomb threats in the Other Crimes category showed the largest percentage increase, up 135 percent from the previous year and an overall increase of 88 percent from the baseline year (1995-96).
- ▶ Other significant one-year increases occurred in the Drug and Alcohol Offenses category. Possession of Paraphernalia increased 73 percent from the previous year, up 27 percent from the baseline year. This increase was anticipated because a new reporting criterion included the possession of marijuana paraphernalia as a reportable offense. Possession of Alcohol rose 33 percent from the previous year, up 20 percent from 1995-96; and Sale and/or Furnishing of Alcohol/Drugs increased 62 percent in one year, up 5 percent from the baseline year. These

increases may reflect more accurate reporting of incidents at the local level rather than an increase in the incidence of these offenses.

- The crimes with the highest crime rates (number of incidents per 1,000 students enrolled) in each of the crime categories were the same as those of the previous year.

Vandalism had the highest rate (1.62) in the Property Crimes category; battery had the highest rate (3.28) in the Crimes Against Persons category; possession of drugs had the highest rate (1.52) in the Drug and Alcohol Offenses category; and possession of weapon(s) had the highest rate (1.29) in the Other Crimes category. Of all reportable incidents, battery continued to have the highest number of incidents per 1,000 students.

- Although overall the crime rate decreased in the Property Crimes category, the dollar loss resulting from these crimes did increase. The total dollar loss was just over \$25 million, or \$4.34 per student,

up from \$16.75 million, or \$2.93 per pupil, in 1997-98 but not substantially greater than that in the baseline year at \$22 million, or \$4.15 per pupil. Most of the increased dollar loss (over \$10 million) was the result of reported incidents of arson.

- The nature and incidence of crime vary according to the school level and continue to be consistent with the student behavioral problems

that occur at each level. At the high school level, Drug and Alcohol Offenses have the highest crime rate (11.68 incidents per 1,000 students). The most common crime occurring at middle/junior high school and county-operated programs is battery. Property crime is the most common crime reported at the elementary school level.

- Although the incidence of Property Crimes continues to decline at the elementary school level, the rate of Crimes Against Persons has increased for a third year. The rates of Drug and Alcohol Offenses and Other Crimes have changed little since CSSA began.

- At the middle/junior high school level, changes in crime rates vary, with no apparent trends emerging. Although the rate of Drug and Alcohol Offenses declined last year, the number of reported offenses increased this year. The crime rate for the Other Crimes category also increased.

- Changes in crime rates also vary at the high school level. Drug and Alcohol Offenses represented 44 percent of the total reported offenses and reached the highest reported level at 11.68 incidents per 1,000 students, while the rates of Crimes Against Persons and Property Crimes remained relatively unchanged.

- Programs operated by county offices of education experienced increases in three of the four crime categories: Crimes Against Persons, Drug and Alcohol Offenses, and Other Crimes. The most significant increase occurred in the category Crimes Against Persons,

- *You need hard data, like CSSA data, to make decisions that will result in improving school safety.*

Wayne Sakamoto
Violence Prevention/Intervention Coordinator
San Diego County Office of Education

rising from a crime rate of 7.19 in 1997-98 to 11.31 in 1998-99.

- ▶ The number of guns (637) confiscated on campus continued to decline, down 1.5 percent from the previous year. The number of knives seized on campus increased for the second consecutive year to 6,168, up 5 percent from 1997-98.
- ▶ As in the previous three years, most known suspects involved in incidents of school crime were male (81 percent); 92 percent of known suspects were students at the school in which the crime occurred.
- ▶ The classification of victims of school crime remains relatively unchanged: 70 percent were male; 89 percent, students; 5 percent, certificated employees; 3 percent, classified employees; and 3 percent, other persons.

CSSA continued efforts to strengthen accurate reporting of school crime data, including regional training sessions and data validation procedures. CSSA provided regional basic training sessions for new CSSA representatives and school or program site recorders and advanced training for experienced representatives and site recorders. A total of 444 individuals attended basic training, and 418 attended advanced training.

The CSSA validation strategies resulted in an improvement in the quality and accuracy of the data submitted to CSSA. The error rate on the CSSA "School Crime Reporting Form" sent to CSSA remained at 10 percent for the second consecutive year. In addition, the percentage of student suspensions resulting in student suspects for drug and alcohol offenses reported to CSSA rose from 78 percent in 1997-98 to 90 percent in 1998-99. In

many districts the increase in numbers reflects improved reporting rather than an increase in the incidence of school crime.

CSSA made progress in achieving all six recommendations contained in the 1997-98 annual report. The results are as follows:

- ▶ CSSA requested data on student suspensions for drug and alcohol offenses and on robbery/extortion incidents from all local educational agencies to validate the accuracy of reported incidents to CSSA. The data were analyzed and the results provided to each agency. Data were received from 97 percent of the agencies.
- ▶ CSSA began collecting data on students suspended under the criterion in *Education Code* Section 48900(a)(2) and conducted an analysis. The law distinguishes incidents of violent student behavior that should be reported to CSSA from those incidents that are not reportable. The analysis showed that school administrators are not consistently using this new category.
- ▶ Validation site visits were made to 72 local educational agencies that either did not respond to the request for 1997-98 suspension data or that did not respond to a request for an explanation of the discrepancies noted in their data. Most of these visits resulted in an increase in the number of incidents reported by these agencies.
- ▶ CSSA completed the field test of the Internet reporting system; 41 local educational agencies participated. The Internet reporting system is now an option for agencies in reporting CSSA data.

- ▶ CSSA developed information about the usefulness of CSSA data to local educational agencies and disseminated it through quarterly newsletters, site visits, and workshops.
- ▶ The collaboration with the Department of Education's Healthy Kids Program Office resulted in the expansion of the California Healthy Kids Program Dissemination Center at Los Angeles County Office of Education to include resources to prevent and/or reduce the incidence of drug and alcohol use and violence among youths.

At the end of each year, CSSA reviews its progress in improving the data collection efforts and reporting process and in increasing the usefulness of the CSSA data at the local level. This year CSSA recommends the following actions:

- ▶ Continue to collect student suspension data and other data on Battery,

Assault with a Deadly Weapon, Drug / Alcohol Offenses, Possession of Paraphernalia, Robbery / Extortion, and Sex Offenses from all school districts for use in validating the number of student suspects reported to CSSA for such incidents.

- ▶ Conduct validation site visits to local educational agencies that either do not submit data on suspensions or have unexplained discrepancies between the number of students suspended and the number suspected of committing CSSA offenses.
- ▶ Test a paperless reporting system to simplify the reporting process at the school and program site.
- ▶ Work toward requiring all districts and county offices of education to submit school or program site incident-level data to CSSA in place of summary data.

- ▶ *A solid program is one that is developed with input from students, parents, teachers, and other representatives from the school and the community.*

Sherry McLaughlin, Coordinator
Child and Family Advocacy Adminis-
tration and Program Development
Alameda County Office of Education

INTRODUCTION

School crime has become an increasingly visible issue in California and the rest of the nation. As violent incidents occur in various public places, the safety of students while they attend school has become a grave concern. The California Legislature adopted *Penal Code* Section 928 et seq. in 1994 as a means of measuring crime and violence in public schools in the state. Since July 1995 all schools, school programs, school districts, and county offices of education are responsible for reporting incidents that occur under a defined set of conditions. CSSA, in turn, compiles the data submitted by these local educational agencies and prepares a statewide annual report for submission to the legislature on or before March 1 of each year.

For this report, incidents reported to CSSA are categorized as follows: Drug and Alcohol Offenses, Crimes Against Persons, Property Crimes, and Other Crimes. Definitions of crimes and a copy of the reporting form are provided in Appendix A. Appendix B contains a list of school safety and violence prevention grant programs available through the California Department of Education. Appendixes C and D contain tables that exhibit emerging school crime trends.

CSSA is administered by a partnership consisting of the California Department of Education, Butte

County Office of Education, and Duerr Evaluation Resources (a private evaluation firm). Those three entities provide staff to support the program at the state level. Representatives of the three entities form the CSSA Management Team and direct the development and implementation of the program. The Management Team also periodically consults the CSSA Advisory Committee, which consists of representatives of the Office of the Attorney General, California Department of Finance, Office of the Legislative Analyst, Secretary of Child Development and Education, K–12 education associa-

tions, and local educational agencies throughout the state. The committee reviews the program, makes recommendations regarding existing and proposed crime categories, and provides valuable insight and perspective in developing information collection and dissemination systems.

The CSSA reporting process is based on the efforts of thousands of people. The staffs at more than 8,000 public schools identify and record crimes; school district and county office of education personnel compile and cross-check the school program site data; and staff members from the CSSA partnership collect and report the data from more than 1,000 school districts and county offices of education. Although CSSA believes signifi-

cant progress has been made in obtaining accurate and consistent data throughout the state over the past four years, caution should be exercised in using the data to compare the incidence of school crime reported by local educational agencies. The incidence of school crime is influenced by factors in the community that are beyond the control of schools.

The CSSA Management Team thanks its partners in local educational agencies, those in state and local law enforcement, and statewide professional organizations and agencies for their support, imagination, good sense, and encouragement in creating and sustaining CSSA.

► *Successful partnerships, based on mutual trust between law enforcement and schools, are the critical part of a truly safe school.*

Jim Koedyker, Board President
Desert Sand Unified School District

RESULTS

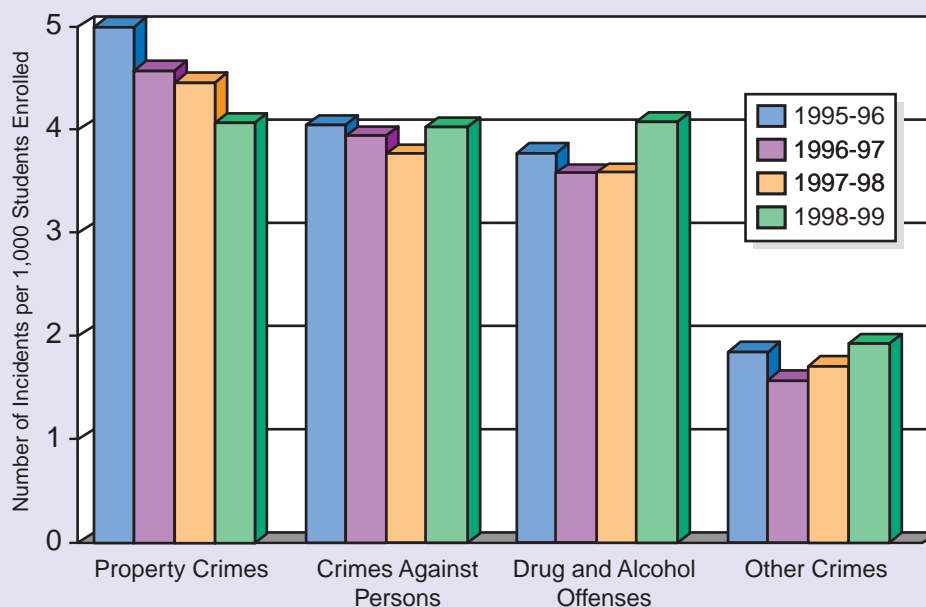

The results presented in this section are based on data submitted by all school districts and county offices of education in California. Information on how these data are collected is presented in the section “Reporting Process.”

Data are aggregated into four reporting categories: Property Crimes, Crimes Against Persons, Drug and Alcohol Offenses, and Other Crimes. Chart 1 displays data indicating trends across these categories for the past four reporting years.

Chart 1

Analysis of School Crime Trends for California Public School Campuses
for the 1995-96 through 1998-99 School Years

As Chart 1 demonstrates, incidents of Property Crimes continued to decline from previous reporting years, while incidents reported in the other three categories increased.

The majority of incidents (91 percent) reported to CSSA occurred on school campuses; the remaining occurred on students' direct route to and from school (5 percent), at a school-sponsored activity (3 percent), or on the school bus (1 percent). Most incidents occurred during school hours (76 percent), which, for CSSA purposes, begin when the first class bell rings in the morning until the last class bell rings in the afternoon.

Table 1 displays the results of CSSA reports of crime incidents per 1,000 enrolled students. Converting the statistics to a crime rate allows longitudinal comparisons of the data by taking into account changes in student population. It is important to note that the criteria for reporting the possession of drug paraphernalia changed from previous years to include the possession of marijuana paraphernalia as a reportable offense. An increase in this category was anticipated as a result of this reporting change. The criteria for reporting and the definitions of reportable incidents for all other categories remained unchanged from previous years.

Table 1

Percentage of Change in Crime Rates in California Public Schools
for the 1995-96, 1997-98, and 1998-99 School Years

Type of Incident	1995-96 BASELINE Incidents per 1,000 Students	1997-98 Incidents per 1,000 Students	1998-99 Incidents per 1,000 Students	Percentage of Change 1997-98 to 1998-99	Percentage of Change 1995-96 to 1998-99
Property Crimes	5.00	4.47	4.12	-8	-18
Vandalism (\$100 or more)	1.74	1.70	1.62	-5	-7
Theft (over \$50)	1.24	1.23	1.06	-14	-15
Burglary (no \$ limit)	1.28	0.94	0.76	-19	-41
Graffiti (\$100 or more)	0.62	0.56	0.64	13	2
Arson (\$100 or more)	0.07	0.05	0.05	-1	-30
Crimes Against Persons	4.10	3.74	4.02	7	-2
Battery	3.31	3.00	3.28	9	-1
Assault with a Deadly Weapon	0.35	0.37	0.35	-7	-1
Robbery/Extortion	0.27	0.21	0.21	0	-22
Sex Offense	0.16	0.16	0.19	17	17
Homicide	<0.001	<0.001	<0.001	-0-	-0-
Drug and Alcohol Offenses	3.77	3.55	3.94	11	5
Possession of Drugs	1.58	1.53	1.52	-1	-4
Use of Alcohol/Drugs	1.35	1.36	1.45	7	8
Possession of Paraphernalia	0.34	0.25	0.43	73	27
Possession of Alcohol	0.20	0.18	0.24	33	20
Sale and/or Furnishing of Alcohol/Drugs	0.20	0.13	0.21	62	5
Possession of Alcohol/ Drugs for Sale	0.10	0.10	0.09	-13	-13
Other Crimes	1.84	1.70	1.88	11	2
Possession of Weapon(s)	1.22	1.23	1.29	5	6
Loitering/Trespassing	0.43	0.32	0.39	23	-9
Destructive/Explosive Devices	0.13	0.10	0.10	-0-	-23
Bomb Threat	0.05	0.04	0.10	135	88

Crime rates are based on the following statewide student enrollments:

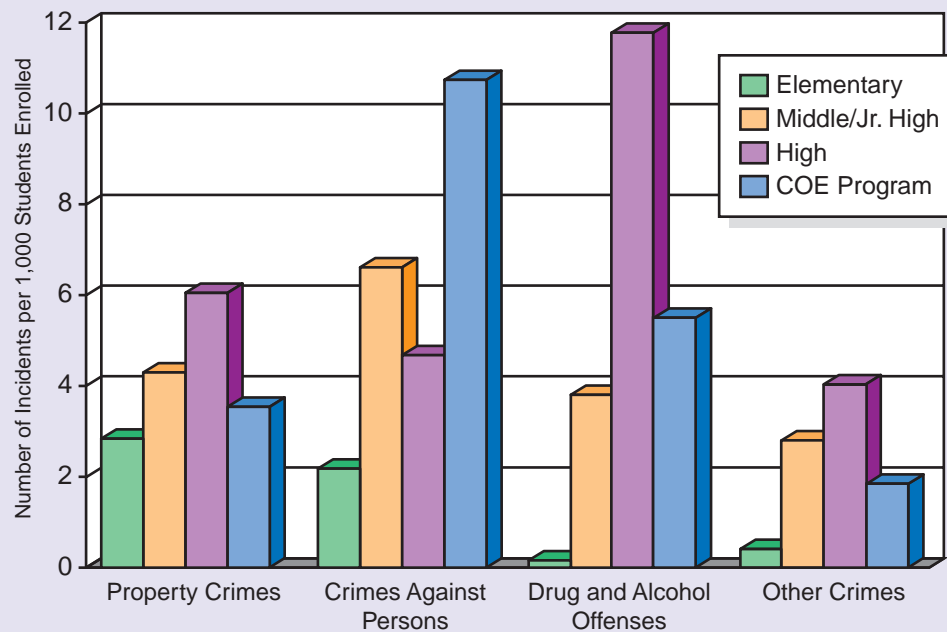

1995-96—5,467,330 students, 1997-98—5,727,303 students, 1998-99—5,839,286 students

Although Chart 1 provides a pictorial representation of overall crime trends, Table 1 provides a more detailed breakdown of the four crime categories. Caution should be exercised when drawing conclusions from the percent change in individual crime categories. Because crime rates are very small (most being less than

0.5 incident per 1,000 students), the percent change tends to overemphasize the change between years. For example, a 0.05 change in the crime rate for bomb threats (from 0.04 to 0.09) constitutes an increase of 135 percent. However, a change in the crime rate of 1.04 to 1.09 (still a 0.05 increase) constitutes an increase of only 5 percent.

Chart 2

Crime Rates in California Public Schools for the
1998-99 School Year (by Type of Crime and School Level)

High schools experience the highest crime rate in all categories except in Crimes Against Persons. Middle/junior high schools and county-operated programs experience the highest rates in that crime category. By far the most common

incident reported at both the middle/junior high school level and the county-operated programs was battery. Drug and alcohol offenses are the most commonly reported crimes at the high school level.

Table 2

Total Number of Crime Incidents Reported in California Public Schools
for the 1995-96, 1997-98, and 1998-99 School Years

<i>Type of Incident</i>	1995-96		1997-98		1998-99

Possession of Paraphernalia	1,843	2	1,430	2	2,526	3
Possession of Alcohol	1,114	1	1,045	1	1,398	2
Sale and/or Furnishing of Alcohol/Drugs	1,088	1	771	1	1,226	2
Possession of Alcohol/Drugs for Sale	555	1	558	1	510	1
Other Crimes	10,061	13	9,729	13	10,980	13
Possession of Weapon(s)	6,680	8	7,061	9	7,554	9
Loitering/Trespassing	2,374	3	1,853	2	2,293	3
Destructive/Explosive Devices	727	1	579	1	585	1
Bomb Threat	280	<1	236	<1	548	<1

Caution: Do not calculate percentage changes in raw data. Changes in raw data do not account for changes in enrollment.

As Table 2 shows, property crimes represent the greatest proportion of crime (30 percent), while batteries are by far the most commonly reported incidents on public school campuses. Twenty-three percent of all reported incidents are batteries.

The economic loss to local educational agencies from property

crimes was just over \$25 million, or \$4.34 per student. This economic loss included the cost of materials, labor, and other costs associated with the repair or replacement of the damaged or lost property. Local educational agencies provided these estimates prior to any compensation by insurance companies or restitution by students or their parents or guardians.

Chart 3

Resulting Dollar Losses to LEAs from Property Crimes on California Public School Campuses for the 1998-99 School Year

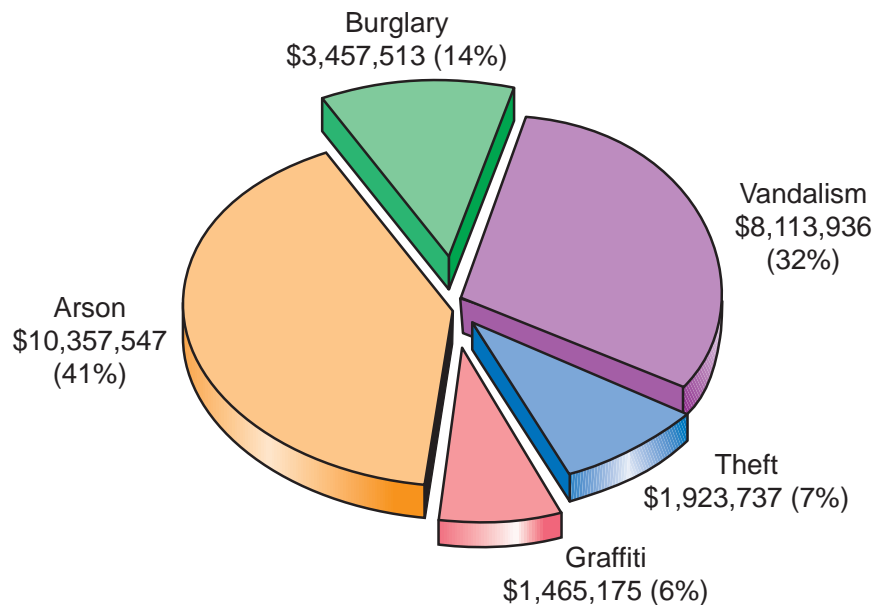

Chart 3 shows a breakdown of the dollar losses by the type of property crime reported.

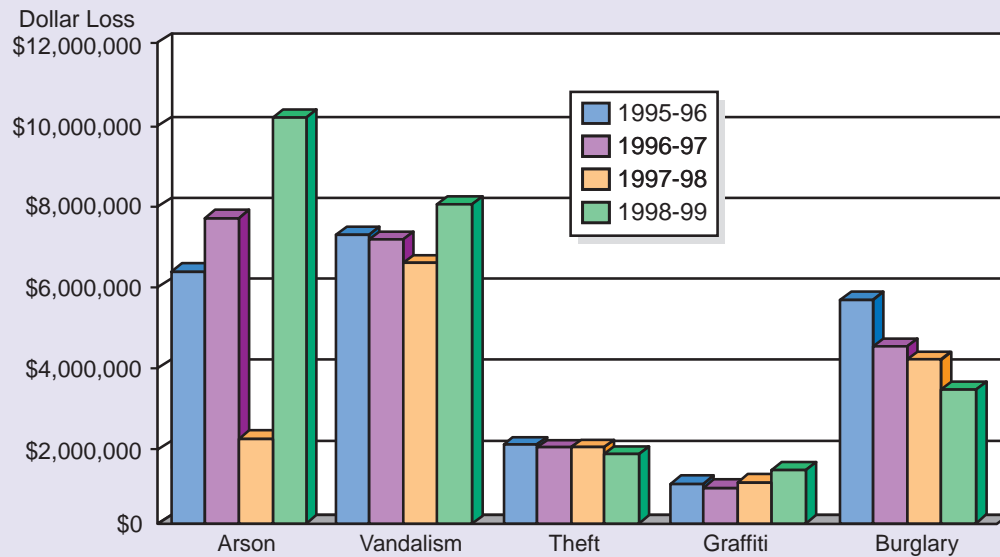

The dollar loss amounts do not represent the total dollar loss resulting from property crimes committed on school campuses or during school-sponsored activities. Except for burglary, only those crimes resulting in an economic loss beyond defined dollar thresholds are reported to CSSA. Incidents of vandalism, arson, and graffiti are reported only if the resulting economic loss is \$100 or more. Incidents of theft are reported if the economic loss is \$50 or more. Further, once a crime is determined to have resulted in a loss greater than the defined dollar threshold, a second criterion must be met before the economic loss is actually reported to CSSA; the loss must involve only school district or county office of education property. Therefore, property crimes against personal property

that result in a loss greater than the dollar threshold are reported to CSSA; the economic loss is not. Approximately one-third of the property crimes committed on public school campuses involve personal property.

In a comparison of the 1998-99 dollar loss with losses experienced in previous years, the data show that while the number of incidents has decreased, the overall dollar loss associated with Property Crimes has increased dramatically from the previous year but is similar to earlier years when dollar losses were just over \$22 million. This increase is primarily due to losses from arson. Arson is a crime that generally results in very high dollar losses, affecting dollar loss figures dramatically. The number of reported incidents of burglary has continued to decline as is further reflected in the dollar losses associated with this crime.

Chart 4

Changes in Dollar Losses to LEAs from Property Crimes on California Public School Campuses for the 1995-96, 1996-97, 1997-98, and 1998-99 School Years

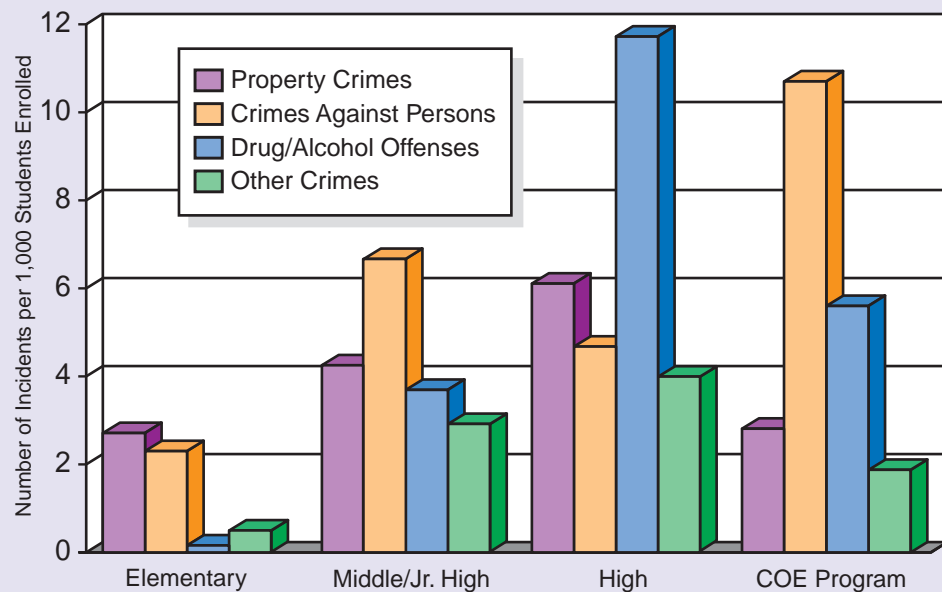

The nature and incidence of crime vary according to the school level and are consistent with the student behavioral problems that occur at each level. For example, at the elementary school level the

lowest crime rate is in Drug and Alcohol Offenses while the highest is in Property Crimes.

Chart 5 provides a comparison of crime rates by school level for the 1998-99 year.

Chart 5

Crime Rates at California Public Schools
for the 1998-99 School Year (by Type of Crime and School Level)

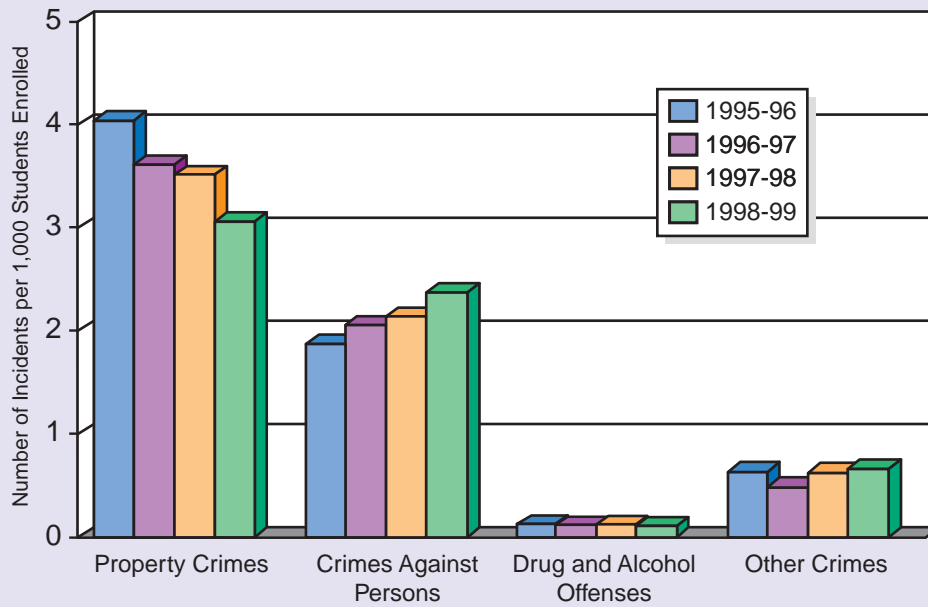

Overall, high school campuses have the highest crime rate in Drug and Alcohol Offenses, with 11.68 incidents occurring per 1,000 students on these campuses. More specifically, the use of alcohol/drugs was the most common type of incident reported at the high school level. By far the most common type of crime occurring at both middle/junior high schools and

county-run programs is in the category Crimes Against Persons; battery is the most common incident reported in this category.

The charts on the following pages display the changes in crime rates for each of the following school levels: elementary, middle/junior high, high, and programs maintained by county offices of education.

Chart 6

Change in Crime Rates in California Public Elementary Schools
for the 1995-96, 1996-97, 1997-98, and 1998-99 School Years

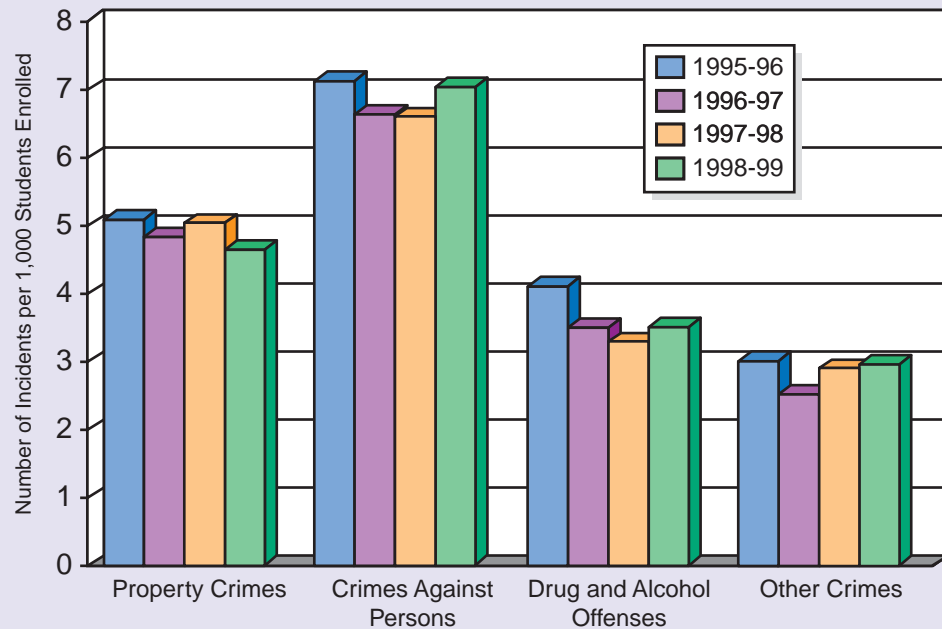

Although the incidence of Property Crimes continues to decline, the rate of Crimes Against Persons has increased for a third year at the elementary school level. The rates of

Drug and Alcohol Offenses and Other Crimes have changed little at this level since the program's inception in 1995.

Chart 7

Change in Crime Rates in California Public Middle/Junior High Schools
for the 1995-96, 1996-97, 1997-98, and 1998-99 School Years

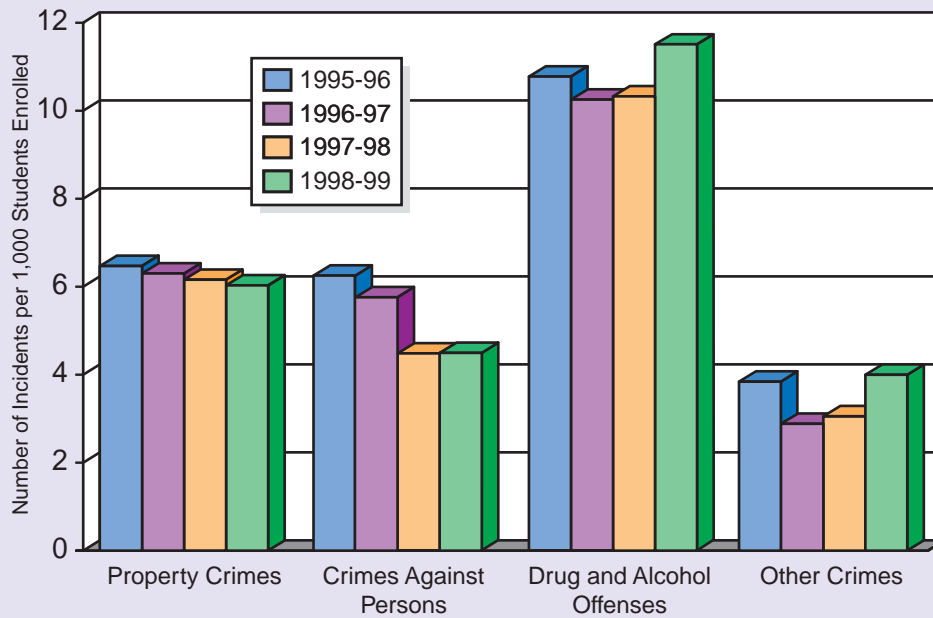

As Chart 7 shows, changes in crime rates vary at the middle school level. No apparent trends are emerging. Although last year it appeared that the rate of Drug and Alcohol

Offenses was beginning to show a downward trend, the pattern reversed itself in 1998-99 with an increase in reported offenses.

Chart 8

Change in Crime Rates in California Public High Schools for the 1995-96, 1996-97, 1997-98, and 1998-99 School Years

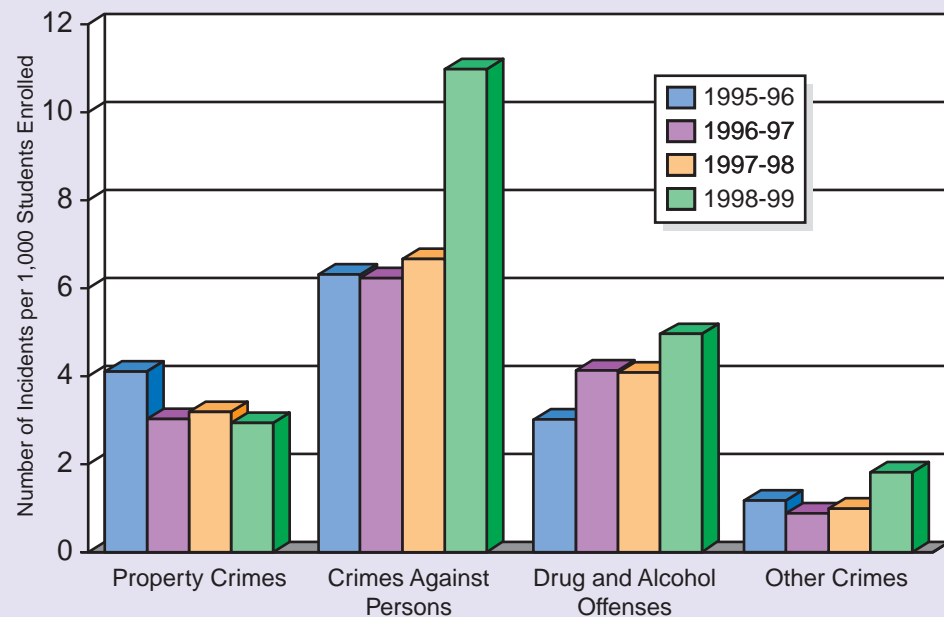

The most common incidents reported on high school campuses are drug and alcohol offenses, representing 44 percent of the total reported incidents. The lowest incident rate for those crimes occurred in 1996-97, when the rate of drug and

alcohol offenses was approximately 10.5 incidents per 1,000 students. Currently, there are just under 12 incidents of drug and alcohol offenses per 1,000 students enrolled in California's high schools.

Chart 9

Change in Crime Rates in County Office of Education Programs
for the 1995-96, 1996-97, 1997-98, and 1998-99 School Years

County offices of education experienced increases in three crime categories. As the chart shows, the most significant increase was in the category Crimes Against Persons. The most common incident reported in that category is battery.

When weapons are involved in school crime, generally they are reported in Crimes Against Persons and Possession of a Weapon. For each of these incidents, school site administrators are asked the following question: *“Was a weapon involved in the incident? If yes, check the type of weapon involved: Firearm, Knife, or Other Type of Weapon.”* If the weapon indicated was a firearm, the administrator is also asked to identify the type of firearm involved: shotgun/rifle,

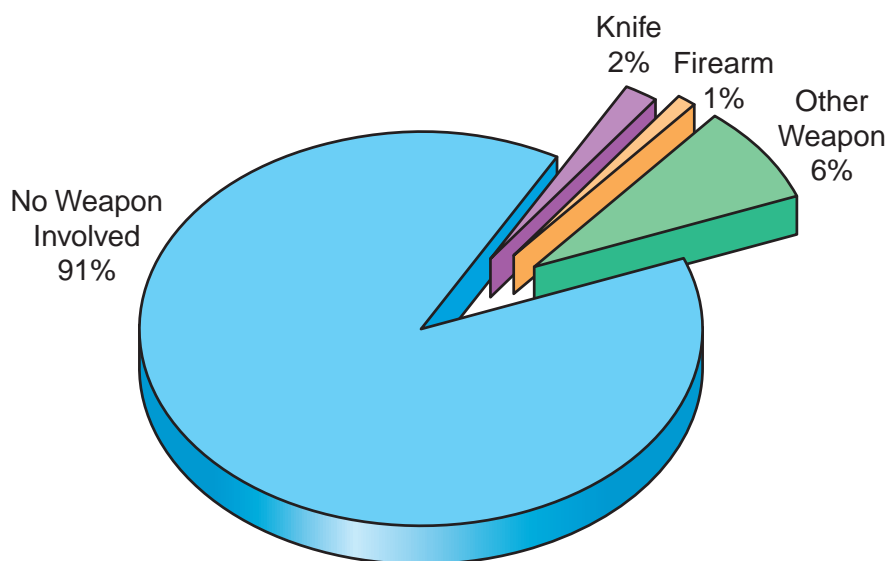

handgun, or other firearm. The criteria for reporting weapons on a public school campus are consistent with the California *Penal Code*. Any knife, gun, or other weapon used during the commission of a crime against a person is reportable to CSSA. However, reporting criteria differ for the category Possession of a Weapon. Although all firearms are reportable, only those knives with a locking blade or with a folding blade longer than 2.5 inches are reported as the possession of a knife. *Other weapons* are any items that are neither a knife nor a firearm but which by design are intended to be a weapon. For example, brass knuckles and ninja stars are both weapons by design and so they would be reportable under CSSA criteria.

Chart 10 displays the percentage of weapons involved in Crimes Against Persons and Possession of a Weapon.

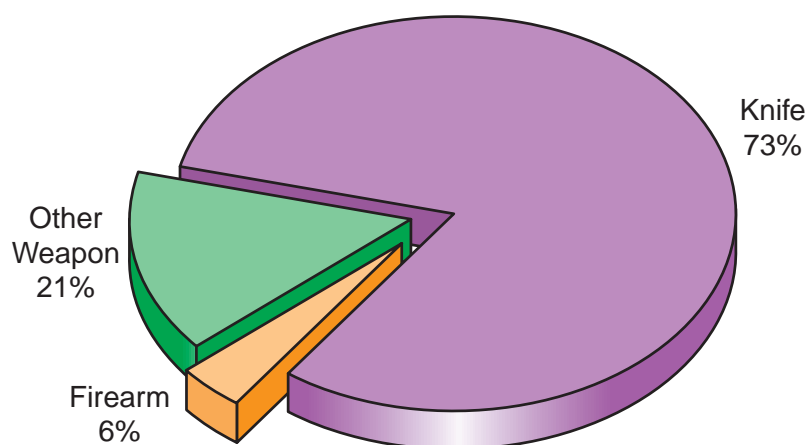

Chart 10

Types of Weapons Involved in Crime Incidents on California
Public School Campuses for the 1998-99 School Year

Crimes Against Persons

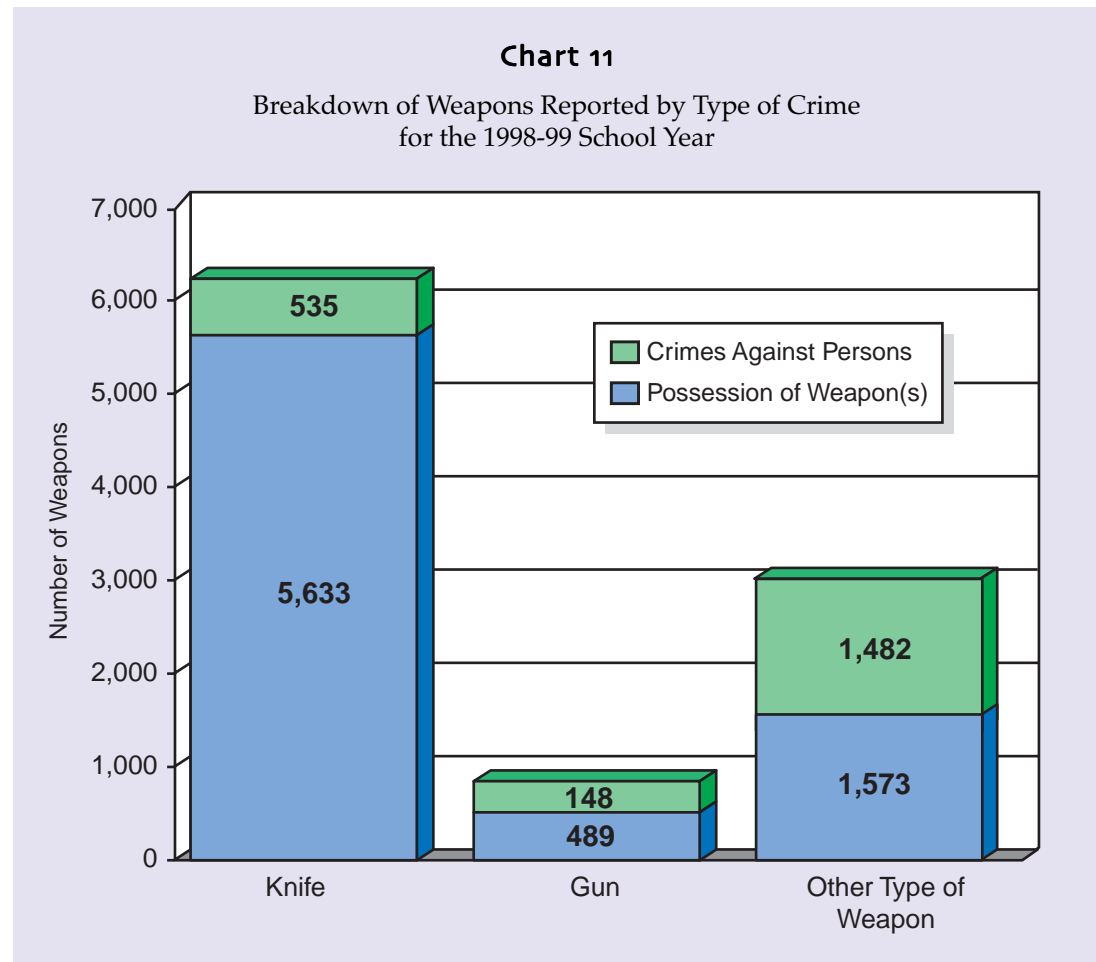

Other Crimes

As indicated earlier, most crimes against persons (81 percent) occurring on California campuses are batteries. By definition, a battery does not involve the use of a weapon.

Overall, only 9 percent of all crimes against persons involved a weapon, with the "other" type of weapon being the most common.

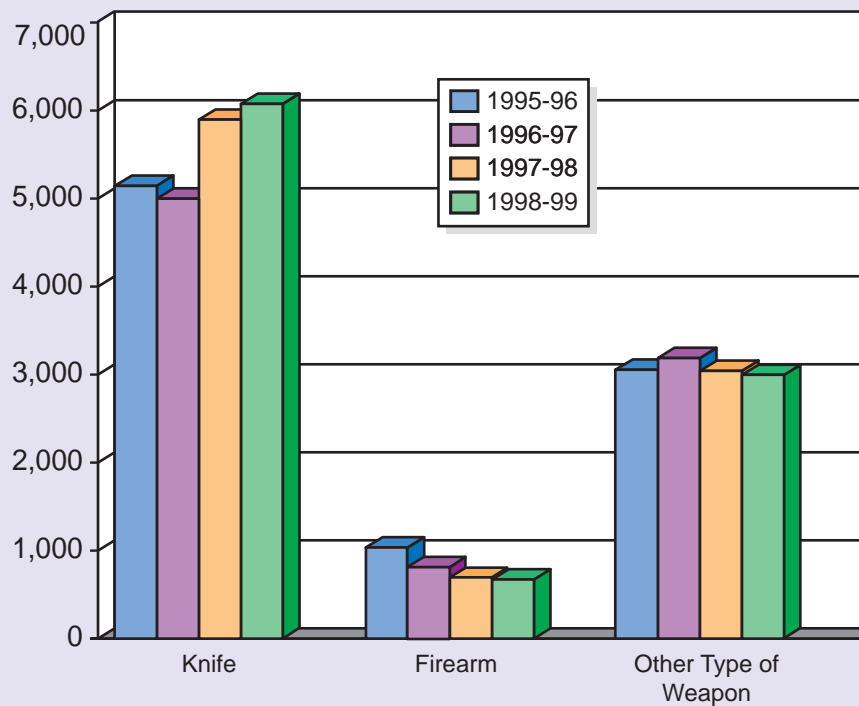

Note: A small number of weapons (118 knives, 82 guns, and 115 other weapons) were reported as being involved in drug and alcohol offenses, property crimes, and other miscellaneous crimes. For simplicity, these incidents are included in the Possession of Weapon(s) category in Chart 11.

Knives are the most common weapons found on campuses; a total of 6,168 knives were reported in 1998-99 (535 were used in crimes against persons and 5,633 were reported to be in the possession of suspects on campus). Firearms are seldom used during the commission of a crime or found in the possession of a person on campus. A total of 637

firearms were confiscated, which, as Chart 12 shows, is a decrease from 647 last year and 724 the previous year. The most common type of firearm found on campuses is a handgun. Of the firearms confiscated, 369 were handguns, 35 were shotgun/rifles, and 233 were other types of firearms.

Chart 12

Breakdown of Weapons Reported for the 1995-96, 1996-97, 1997-98, and 1998-99 School Years

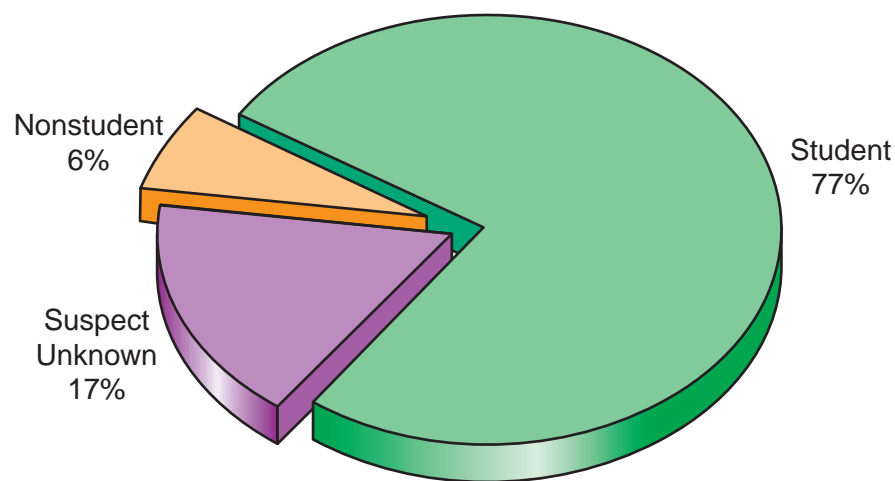

Most known suspects involved in school crime were male (81 percent); 92 percent of known suspects were students at the school in which the crime occurred. Chart 13 shows the breakdown of suspect classification, including those classified as unknown. By far the largest category is the Student category. The only

exception is Property Crimes, in which case most suspects are unknown (58 percent). The percentage of suspects unknown for Property Crimes has dropped significantly from 1997-98, when findings revealed that administrators were unable to determine a suspect for just over 80 percent of reported incidents.

Chart 13

Classification of Suspects Involved in Incidents on California Public School Campuses for the 1998-99 School Year

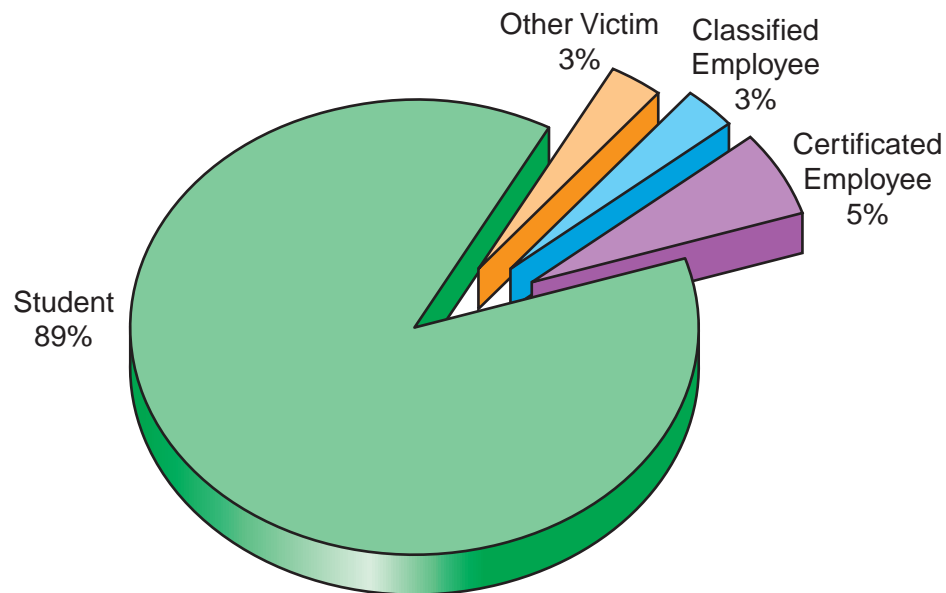

For Crimes Against Persons, site recorders are asked to provide a description of the victim(s). The description is limited to the gender and classification (certificated employee, classified employee, student,

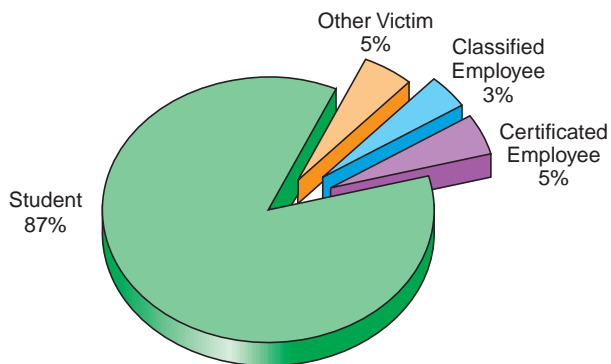

or other) of the victim. As with the suspects involved in the incidents, most victims are male (70 percent). Chart 14 provides a breakdown of the classification of victims of crimes against persons.

Chart 14

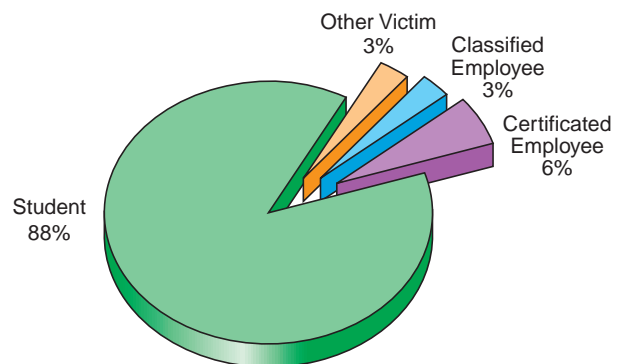

Classification of Victims Involved in Crimes Against Persons on California
Public School Campuses for the 1998-99 School Year

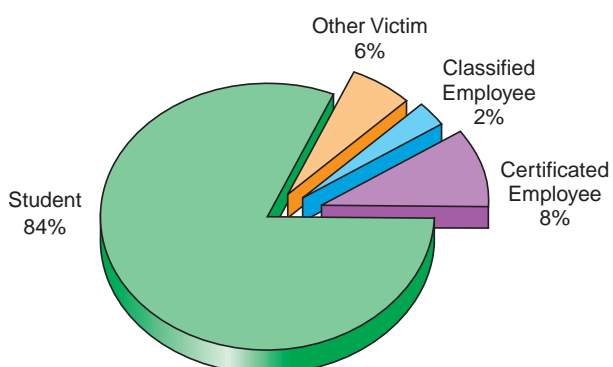

Assault with a Deadly weapon

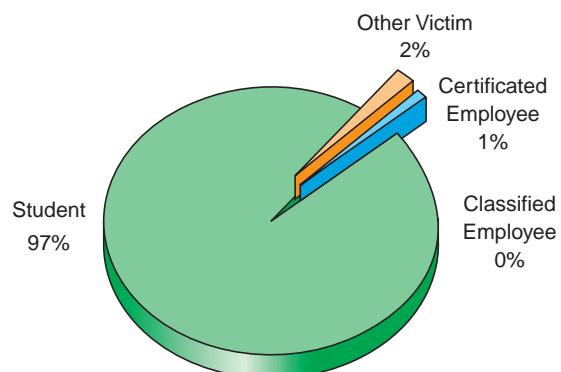

Battery

Robbery/Extortion

Sex Offenses

REPORTING PROCESS

The CSSA reporting process is based on the premise that individual incidents of school crime should be reported as soon as possible after the crime occurs. Each school or program site has a designated recorder who is responsible for reporting incidents to CSSA. All school sites use a common instrument, the “School Crime Reporting Form” (referred to as the CSSA incident form; see Appendix A), to document each incident. The CSSA Management Team developed the original one-page form from suggestions made by the advisory committee after a thorough review of existing national school crime reporting systems. The crimes listed on the CSSA incident form, as well as additional information about each incident, are defined by state regulations. In 1998-99 the State Board of Education approved amendments to the regulations, which resulted in changes to the CSSA incident form. Although the crime categories remain unchanged, recorders are asked to provide more details about each reported incident. For example, recorders are asked to indicate the type of firearm involved (e.g., shotgun/rifle, handgun, or other type of firearm) rather than simply indicate that a firearm was involved in an incident.

Each school district and county office of education designates a CSSA representative to serve as a liaison between the site recorders and CSSA. These representatives have access to basic and advanced training programs and materials designed to help them establish a consistent and reliable reporting process at each school or program site. CSSA representatives are responsible for coordinating the CSSA activities of individual sites through communication with site recorders who are designated by the site administrator. Site recorders are responsible

for completing the CSSA incident form and sending it to their CSSA representative each month. Before sending the completed forms, the site recorder is asked to review them for accuracy and to cross-check them with secondary data at their site (e.g., suspension records, discipline referrals, theft and vandalism reports) to ensure that all reportable incidents are recorded.

The CSSA representative decides the type of CSSA data to report to the state: incident data or summary data. The representative may also choose

from three methods for submitting incident data:

- ▶ Bundle the individual incident forms and send them to CSSA for aggregation and analysis.
- ▶ Enter the incident data directly into the statewide database through the Internet.
- ▶ Enter the incident data into the CSSA Data Entry and Reporting System and submit a diskette containing an export of this database.

Local educational agencies that choose to report summary data have two options for submittal:

- ▶ Enter the incident data into the CSSA Data Entry and Reporting System and submit a summary report generated from the system.
- ▶ Manually aggregate the incident data and enter this information on the "Semi-Annual District Summary Reporting Form" provided by CSSA.

In 1998-99, 55 percent of the local educational agencies elected to report incident data (48 percent submitted their actual incident forms; three percent submitted a diskette; and four percent submitted their data through the Internet). The remaining 45 percent of local educational agencies reported summary data to CSSA (35 percent manually aggregated their data, and 10 percent used the CSSA Data Entry and Reporting System to generate a summary report).

One of the goals of the CSSA program has been to streamline the reporting process for school districts and county offices of education. Efforts to date have included built-in accuracy checks and the ability to generate localized reports within the

existing electronic systems. Future efforts include a pilot program to test the feasibility of a paperless reporting system. Such a system would allow local educational agencies to enter all data directly into the computer without completing the paper version of the "School Crime Reporting Form."

Accuracy of the Data

To determine whether the CSSA system was accurate and reliable and to improve the statewide system of reporting, CSSA staff developed and implemented a validation system with three primary procedures:

- ▶ The CSSA Management Team and staff employed quality control measures on all returned forms to ensure that the forms were complete and internally consistent.
- ▶ Validation visits were conducted at selected reporting agencies.
- ▶ CSSA staff conducted a validation cross-check between certain CSSA data and the number of student suspensions. This check was gleaned from data on student suspensions collected from 97 percent of local educational agencies.

CSSA's internal quality control system intercepts all improperly completed incident forms and summary forms and corrects them. The number of incident forms that were initially sent to CSSA with blanks or inconsistent responses dropped from 25 percent in 1995-96 to 13 percent in 1996-97 and declined to 10 percent in 1997-98. The 1998-99 error rate remained steady at 10 percent. All forms were subsequently corrected through collaboration with the reporting agency. This information suggests that

ongoing efforts by the CSSA team to provide technical assistance and training to local educational agencies have led to improvements in reporting quality.

In 1998-99 a total of 72 local educational agencies were randomly selected for validation site visits. The sites selected included all agencies that either did not respond to the request for 1997-98 suspension data or that did not respond to a request for an explanation of the discrepancies noted in their data. The primary purpose of the site visits was to assist individual agencies with documenting the accuracy of their data and to provide technical assistance to bring the agencies' reporting up to CSSA standards.

Determining the accuracy of school crime data reported presents technical challenges primarily because few records of local educational agencies can be used to corroborate data reported to CSSA. However, student suspension records may be used as comparison data. The CSSA definitions of reportable offenses are consistent with several categories in *Education Code* Section 48900:

- ▶ The possession, use, sale, or furnishing of drugs and/or alcohol
- ▶ The possession of drug paraphernalia
- ▶ The commission of a battery or assault with a deadly weapon
- ▶ The commission of a robbery/ extortion
- ▶ The commission of sex offenses

Although there are exceptions to correlations of data between the two sets of data (the student suspension records and the incidents of crime), usually when a student is suspended for one of the offenses noted above, the incident involving the student suspect will be recorded on a CSSA incident form. Examples of possible exceptions include incidents occurring when students are truant (an infraction that merits suspension but is not reportable to CSSA, causing the local educational agency to appear to be underreporting) or incidents occurring for which alternative discipline procedures are invoked (diversion programs for drug/ alcohol offenses may make a local educational agency appear to be overreporting).

- ▶ *Schools need to empower kids to help solve school problems. It's the relationships with the students that give you the information you need when things go wrong.*

Stephen N. Thom, Mediator
U.S. Department of Justice

Data on student suspensions were collected from 1,014 (97 percent) local educational agencies. The suspension analysis portion of the validation component of CSSA determines (1) the reporting agencies' level of compliance; and (2) the overall accuracy of the statewide data set. The level of compliance by individual reporting agencies is summarized in Table 3.

As the table shows, the majority of reporting agencies are reporting accurately. Ninety percent of required reporters receive an 80 percent match or higher in two of the five reporting categories. The categories with the

lowest level of compliance by individual agencies were Batteries and Assaults with a Deadly Weapon and Drug and Alcohol Offenses. However, as noted in the table, *Education Code* Section 48900 (a)(2), which is used by administrators as the basis for suspending students for committing batteries or assaults with a deadly weapon, is a new suspension category added in January 1998. It is anticipated that site recorders will need time to learn about a new category in the code, and some degree of error is likely to occur in the results.

Table 3

Compliance of Local Educational Agencies with CSSA
in Selected Reporting Categories for the 1998-99 School Year

Level of Reporting Compliance	Number and Percentage of Reporting Agencies by Reportable Crime Category									
	Battery/ Assault with a Deadly Weapon ¹		Drug/Alcohol Offenses		Robbery/ Extortion		Possession of Paraphernalia		Sex Offenses	
	Number	%	Number	%	Number	%	Number	%	Number	%
Agencies reporting less than half of reportable offenses	100	10	76	7	69	7	90	9	54	5
Agencies reporting 50–79% of reportable offenses	26	3	52	5	16	2	28	3	7	1
Agencies reporting 80–99% of reportable offenses	23	2	78	8	1	<1	8	1	1	<1
Agencies with a 100% data match	622	62	671	66	898	89	837	83	910	90
Agencies that appear to be overreporting	229	23	137	14	30	3	51	5	42	4

¹ The suspension category used to validate batteries and assaults with a deadly weapon, based on *Education Code* Section 48900 (a)(2), was a new one in 1998-99. It is anticipated that there is an unknown level of error in this suspension category that would affect the calculated level of compliance with CSSA.

In regard to overreporting drug and alcohol offenses, a violation of *Education Code* Section 48900, subsections (c) and (d), the CSSA team discovered that a new trend is emerging in the way school districts and county offices of education discipline students who commit drug and alcohol offenses. Some school districts and county offices of education now offer diversion programs to students arrested for possession or use of drugs or alcohol. The districts may order students to enter a diversion program instead of imposing suspension, resulting in what appeared at first to be overreporting of CSSA incidents when compared with suspension data.

Although most local educational agencies are accurately reporting incidents, the information in Table 3 does not provide an understanding

of the accuracy of the statewide data set. Because 516 agencies (49 percent) reported ten or fewer crimes during 1998-99 and 220 agencies (21 percent) reported zero crime, the results are not representative of the statewide data set. Therefore, it is important to conduct a separate analysis of the statewide data set to determine its overall accuracy. The results of this analysis are summarized in Table 4.

Compared with the suspension data, Drug and Alcohol Offenses appears to be the most accurately reported category of CSSA offenses (90 percent reported). Sex Offenses are also reported accurately; 86 percent of reported suspensions are accounted for on a CSSA incident form. In 1998-99 the most common offense committed by students that was not reported to CSSA was Possession of Paraphernalia. The most

Table 4

Statewide Comparison of the Number of Student Suspensions
and the Number of Student Suspects on CSSA Incident Forms
for the 1998-99 School Year

<i>CSSA Reporting Category</i>	<i>Number of Student Suspensions</i>	<i>Number of Student Suspects</i>	<i>Percentage of Student Suspects Compared with Student Suspensions</i>
Battery and assault with a deadly weapon ¹	7,645	8,129	106
Use, possession, sale, and/or furnishing of drugs or alcohol	10,941	9,801	90
Robbery/extortion	625	428	69
Possession of paraphernalia	1,910	1,003	53
Sex offenses	473	409	86

¹ The suspension category used to validate batteries and assaults with a deadly weapon, based on *Education Code* Section 48900 (a)(2), was a new category in 1998-99. It is anticipated that there is an unknown level of error in this suspension category that would affect the calculated level of compliance with CSSA.

likely explanation for this under-reporting is the change in reporting requirements. In the past the possession of marijuana paraphernalia was not reported to CSSA. However, beginning in July 1998, this offense is

reportable. Based on responses to the 1998-99 suspension/CSSA correlation report sent to all local educational agencies, some agencies did not make changes to their CSSA reporting standards until well into the 1998-99 reporting year, resulting in underreporting in that category.

Training

The CSSA training program continues to attract participants from local educational agencies throughout the state. The program offers basic training for new CSSA representatives and school or program site recorders and advanced

training for those who have previously attended a basic training or who have been implementing the process for more than a year. CSSA presented both types of training at nine regional sites in the fall and three sites in the spring, serving a total of 444 persons in basic training sessions and 418 in advanced training. Of the 862 persons attending basic and advanced sessions, 125 attended both sessions, resulting in a total of 737 different trainees served during the year. Because of turnover in local educational agency staff assigned to CSSA, these sessions continue to be well attended.

Participants are asked to evaluate each training session by using a rating scale for each of the four areas presented. A "1" means not at all useful, and a "5" means very useful. Table 5 shows the average score given for each area of the basic training sessions.

Participants are also given an opportunity to provide comments about the training session. Common responses to the question "What did you like best about the training?" are as follows:

- ▶ Practice completing the form using the crime scenario examples
- ▶ The role-plays done by trainers
- ▶ Clarification of crime definitions
- ▶ The use of technology and visual aids
- ▶ The opportunity to interact with trainers and ask questions
- ▶ The materials provided

The content of basic and advanced training is continually improving as the CSSA staff discovers more efficient ways for local educational agencies to manage the reporting process and use the data effectively in their own district or county office of education. Excellent reporting systems are in place statewide, and CSSA gleans creative and practical solutions from the field to share with training attendees.

Once again, to prepare superintendents for the public release of the 1997-98 annual report, CSSA held four communications and media relations training sessions throughout California. The director of the Communications Office in the California Department of Education assisted in the presentation this year by presenting a session on developing media relations

- ▶ *The School Resource Officer's role is proactive instead of reactive. The opportunity to establish relationships of trust and respect with students has long-lasting positive effects.*

Frank Onciano, Patrol Officer
Berkeley Police Department

and one on responding to difficult questions. These training sessions are popular with superintendents and public information officers, who appreciate the opportunity to prepare for public reaction to release of the data. The training helps them develop strategies for communicating with their communities about constructive uses of the report.

The release of the interactive training kit in 1999 provided an additional training tool for use in the field. The kit was designed to assist representatives from the school district and county office of education in training their site recorders who, in turn, can use it as a self-guided tutorial. The training kit includes an interactive CD-ROM, a video in which student actors simulate possible school crime scenarios, and a user's guide.

The CD-ROM helps users to learn how to:

- ▶ Set up a model reporting system at the district or county office of education and at the school or program site.
- ▶ Determine whether an incident should be reported to CSSA.

- ▶ Complete the CSSA incident form accurately.

Additional CD-ROM sections contain common questions, previews of available school safety and violence prevention videos, a resource index, information about electronic reporting, and an interactive game called "Try It" for testing the participant's skill in completing a CSSA incident form and his or her knowledge of incidents commonly reported to CSSA. The companion video provides examples of crime scenarios along with tips on identifying reportable incidents.

Technical Assistance

CSSA continues to offer technical assistance in various forms to all local educational agencies to ensure accurate recording and reporting of data to the state. The technical assistance telephone line (800-273-6363) operates on weekdays from 8:30 a.m. to 4:30 p.m., and staff members answer questions about crime categories, transmission of data, requests for materials, electronic reporting of school crime, and other issues related to school safety. The 13,000 telephone

Table 5

Summary of Basic Training Session Evaluations

Training Areas	Usefulness (The ability to make use of the ideas or information presented)	Quality (How well the activity, discussion, or presentation was organized and presented)
Why Report	4.4	4.4
Developing a System	4.3	4.4
The School Crime Reporting Form	4.6	4.6
Definitions of Crime Incidents	4.8	4.7

calls received since the inception of the program reveal the success of this technical assistance tool. The quarterly newsletter, *The CSSA Update*, provides current information about the program, answers to frequently asked questions, and information regarding other issues related to school safety. The newsletter is mailed to all CSSA district representatives and school district superintendents and can also be accessed through the CSSA homepage at <http://www.cssa.butte.k12.ca.us/>.

The CSSA homepage has also proven to be an effective technical assistance tool. In addition to information about CSSA, the Web site provides information about prevention and safety programs; model crime prevention and safety programs; and local, state, and federal resources. The homepage offers

online registration for training sessions and allows all CSSA published documents to be viewed online.

Technical assistance visits were offered to all districts and county offices of education during the 1998-99 school year. The format of the visit was determined by the individual needs of the requesting agency. CSSA personnel made 24 visits, most of which were in the form of a one and one-half hour mini-training session. These shorter, tailor-made training sessions reached an audience of nearly 600 that may not otherwise have been able to participate in training. In addition, three CSSA representatives requested that a CSSA consultant meet with them individually to assist them in establishing a more effective CSSA recording and reporting system.

► *We have had tremendous success with our retention program because of the collaboration between the schools, probation, and campus police.*

Ray Davis, Probation Supervisor
Kern County

FINDINGS AND RECOMMENDATIONS

Improving the accuracy and consistency of the data collected by schools and submitted to CSSA is a major focus of the CSSA program. Training, technical assistance, and validation activities (including site visits) are all part of a well-developed plan to assist local educational agencies in developing a reporting system that ensures all CSSA reportable incidents are reported. Those efforts have begun to pay off. The error rate on the “School Crime Reporting Form” sent to CSSA during 1998-99 remained at ten percent for the second consecutive year. In addition, the percentage of student suspensions resulting in student suspects for drug and alcohol offenses reported to CSSA rose from 78 percent in 1997-98 to 90 percent in 1998-99. As anticipated, the improvements in the accuracy and consistency of the data have resulted in an increase in the number of incidents reported to CSSA and the corresponding crime rate for the 1998-99 school year. In many districts the increase in numbers reflects improved reporting rather than an increase in the incidence of school crime.

Three of the four CSSA crime categories (Crimes Against Persons, Drug and Alcohol Offenses, and Other Crimes) show an increase in the crime rate for the 1998-99 school year compared with the rates for 1997-98. The one exception is Property Crimes. This category continued to show a decline, down 8 percent.

When the crime rates for all four categories in 1998-99 are compared with those for the baseline year, 1995-96, one sees that an increase occurred in only two crime categories: Drug and Alcohol Offenses, up 5 percent, and Other Crimes, up 2 percent. In Property Crimes there was an 18 percent decline. In Crimes Against Persons the crime rate was down 2 percent.

An increase occurred in the number of drug and alcohol offenses reported to CSSA for the first time in the program's history, up 11 percent since 1997-98 and 5 percent since the baseline year. The highest percentage increase was in Possession of Paraphernalia, up 73 percent since 1997-98 and 27 percent since 1995-96. However, this increase reflects an expanded definition of reportable incidents. A change in the *Penal Code* resulted in the possession of mari-

juana paraphernalia being added as a reportable incident effective July 1, 1998. Of the other five incidents in this category, Possession of Drugs and Possession of Alcohol/Drugs for Sale continued to show a decline. Use of Alcohol/Drugs, Possession of Alcohol, and Sale and/or Furnishing of Alcohol/Drugs showed an increase, reaching the highest levels since the CSSA reporting process began.

In the Other Crimes category, bomb threat incidents accounted for the largest percentage increase, up 135 percent since 1997-98 and 88 percent since 1995-96. The majority of these incidents may have been a part of pranks that oc-

curred on many California school campuses following the shooting incident at Columbine High School in Littleton, Colorado, in April 1999. In addition to the increase in reported bomb threats, there was a 23 percent

increase in reports of loitering/trespassing on school campuses and a 5 percent increase in reports of possession of weapon(s) since 1997-98. Although the number of firearms confiscated on school campuses (637) continued to decline, down from 647, the number of knives confiscated rose to 6,168 from 5,862 in 1997-98 and 5,373 in the baseline year, 1995-96. Increased security measures on many campuses may have contributed to the increased reporting of these incidents.

In the Crimes Against Persons category, the crime rate of reported Sex Offenses rose 17 percent compared with 1997-98 and the baseline year. The crime rate of Battery reported to CSSA has increased 9 percent since 1997-98 but was 1 percent below the rate reported in the baseline year. The rate of Assault with a Deadly Weapon continued to decline, down 7 percent since 1997-98 and 1 percent since 1995-96. The rate of Robbery/Extortion remained unchanged from the previous year but was 22 percent below that in the baseline year. The rate of Homicide remained unchanged from that in the previous year and the baseline year.

Although the rate of Property Crimes was at the lowest level since the program began, the dollar loss for such incidents was more than \$25 million, up from \$16.75 million last year and from \$22.5 million in 1995-96. The increase in the dollar loss is attributable to the reported incidents of arson, which accounted for 41 percent of the total dollar loss of more than \$10 million. Although the crime rates of vandalism, theft, and burglary continued to drop, the crime rate of graffiti increased, up 13 percent compared with 1997-98 and 2 percent compared with the baseline year.

- *Law enforcement and schools are trying to accomplish the same thing—have the safest environment for the kids to be educated—whether in the community or in the schools. We need to work together. We can do a lot more together than we can alone.*

Mike Lyon, Undersheriff
Siskiyou County

Although this report shows relatively low crime rates at California public school campuses, any level of school crime is too much and must be addressed. To address it, schools must have a way to measure the level of school safety. CSSA data can be an excellent tool for this purpose. School administrators may use CSSA data to assess the current status as well as the prevalence and trends of crime on their campuses and at school-related functions to determine where to focus resources and to evaluate programs for their effectiveness. However, the usefulness of CSSA data depends on the accuracy of the data. Therefore, the California Department of Education must continue its training and technical assistance efforts to ensure that all schools understand how and what to report and have a system in which all reportable incidents are reported.

The Department should also continue to provide schools with information on the usefulness of CSSA data. In addition to using the data to assess and report the prevalence and trends of school crime, schools can use CSSA data to develop needs assessments and evaluation measures for grant fund applications. In fact, the Department now requires CSSA data to be included in school safety grant applications to verify needs and services. Most funding opportunities require resources to be focused at the school or program site level; therefore, each school needs to have its own incident data readily available to take advantage of these opportunities as they arise. The availability of school-level incident data allows a more detailed analysis of the types of incidents occurring at a particular campus and also enables school staff, parents, and the commu-

nity to make informed decisions about safety issues.

To provide schools with easy access to accurate objective information that effectively reflects program needs and resources, CSSA recommends several actions for the 1999-2000 school year:

- ▶ Continue validation efforts to improve the accuracy and consistency of the data submitted to CSSA, as follows: (1) collect student suspension data and other data on Battery, Assault with a Deadly Weapon, Drug/Alcohol Offenses, Possession of Paraphernalia, Robbery/Extortion, and Sex Offenses from all school districts for use in validating the number of student suspects reported to CSSA for such incidents; (2) conduct validation site visits to local educational agencies that either do not submit data on suspensions or have unexplained discrepancies between the number of students suspended and the number suspected of committing reportable offenses.
- ▶ Test a paperless reporting system to simplify the reporting process at the school and program site.
- ▶ Work toward requiring all school districts and county offices of education to submit school or program site incident-level data to CSSA instead of summary data.

- ▶ *If you do a quality job of collecting CSSA data, then it should give you a perspective on your school climate. CSSA data can be very informative when combined with other data.*

Definitions of Crime

<i>Crime</i>	<i>Definition</i>	<i>Legal References</i>
Arson	The willful and malicious setting of fire to or burning of any structure or property. Arson does not include one burning his or her own property unless there is injury to another person or another person's property. For purposes of the CSSA, arson is reported only if the economic loss is \$100 or more.	<i>Penal Code</i> , sections 451 and 452
Assault with a Deadly Weapon	The use of a firearm, deadly weapon, or instrument other than a firearm or by any means of force likely to produce great bodily injury. <i>Reporting tip: Great bodily injury is defined as loss of consciousness, concussion, bone fracture, loss, or impairment of any organ, a wound requiring extensive suturing, and serious disfigurement.</i>	<i>Penal Code</i> , sections 244.5, 245, 245.5, and 417.4
Battery	The willful and unlawful use of force or violence upon the person of another. <i>Reporting tip: Three primary elements must be present for a crime incident to be reported as battery: (1) an aggressor (suspect), who (2) intended to cause physical harm, to (3) an innocent person (victim).</i>	<i>Penal Code</i> , sections 242 and 243.2
Burglary	Any entry with the intent to commit a theft (even petty theft) or any felony, even though force may not have been used to gain entry.	<i>Penal Code</i> , Section 459
Destructive/Explosive Devices	Destructive devices means any projectile containing any explosive or incendiary material or any chemical substance, bomb, facsimile bomb, grenade, explosive missile, or similar device or any launching device; weapon of a caliber greater than .60 caliber which fires fixed ammunition or any ammunition other than a shotgun; rocket, rocket propelled projectile or similar device of diameter greater than .60 inch or launching device; breakable container which contains a flammable liquid with a flashpoint of 150 degrees Fahrenheit or less and has a wick or similar device capable of being ignited; and any sealed device containing dry ice (CO ₂) or other chemically reactive substances. Explosive devices means any substance, or combination of substances, the primary common purpose of which is detonation or rapid combustion. Explosives include, but are not limited to, dynamite, nitroglycerin, black powder, propellant explosives, detonation primers, blasting caps, or commercial boosters; substances determined to be class A and class B explosives by the United States Department of Transportation; nitro carbo nitrate substances (blasting agent) as classified by the United States Department of Transportation; any material designated as an explosive by the State Fire Marshal; and certain class C explosives designated by the United States Department of Transportation. Included in this category also are written or oral threats to use destructive / explosive devices. <i>Reporting tip: Devices such as snappers or poppers, firecrackers, and fireworks shall not be reported.</i>	<i>Penal Code</i> , sections 148.1 and 12301(a) <i>Health and Safety Code</i> , Section 12000
Drug and Alcohol Offenses	Drug and alcohol offenses means the possession, use, sale, or furnishing of any drug, alcohol, or intoxicating substance, as well as drug paraphernalia, that is prohibited by law. Crimes to be reported for the purposes of the CSSA under Drug and Alcohol Offenses include Use of Alcohol/Drugs, Possession of Alcohol, Possession of Drugs, Possession of Paraphernalia, Possession for Sale of Drugs / Alcohol, Sale and / or Furnishing of Drugs / Alcohol.	<i>Penal Code</i> , sections 308(b), 380, 381, and 647(f). <i>Health and Safety Code</i> , sections 11014.5, 11018, 11054–11058, 11351, 11357, 11359, 11360, 11364, 11364.7, 11550, 11680, and 11681. <i>Business and Professions Code</i> , Section 25608

Definition of Crime (Continued)

<i>Crime</i>	<i>Definition</i>	<i>Legal References</i>
Graffiti	Graffiti means any form of unauthorized painting, writing, or inscription on another's property regardless of the content or nature of the material used in the commission of the act. Reporting for the purposes of the CSSA program shall be limited to incidents of graffiti that result in an economic loss of \$100 or more.	<i>Penal Code</i> , Section 640.5
Homicide	The unlawful killing of a person by another person.	<i>Penal Code</i> , sections 187 and 192
Loitering/Trespassing	Loitering is to delay, to linger, or to idle about any school or public place without lawful business for being present. Trespassing refers to the entry on school grounds during school hours without registering with the site or program administrator, as required by law, and remaining after being asked to leave, or returning to the school grounds within 30 days of being asked to leave. Parents are an exception to this rule. Parents may return after seven days of being asked to leave.	<i>Penal Code</i> , sections 626.7–626.9
Possession of Weapon	The unauthorized possession of dangerous weapons, which include, but are not limited to, firearms, knives, and other weapons.	<i>Penal Code</i> , sections 244.5, 417, 653(g), 12020, 12220, 12403.7(d), and 12403.8
Robbery/Extortion	Robbery means the taking of property in possession of another, from his or her person or immediate presence, and against his or her will, accompanied by force or fear. Extortion means a threat to take or the taking of property from another person without his or her consent. The extortion was induced by a threat of force or wrongful use of fear. Extortion may occur over a period of time.	<i>Penal Code</i> , sections 71, 211, 212, 518, and 519
Sex Offenses	Sex offenses mean sexual battery, rape, statutory rape, sodomy, lewd and lascivious conduct with children, oral copulation, and child molestation.	<i>Penal Code</i> , sections 243.4, 261, 261.5, 286, 288, 288a, and 647.6
Theft	Theft (larceny) is the taking, leading, driving, or carrying away of property (including motor vehicles) belonging to another with the intent to deprive the rightful owner of its use. For purposes of the CSSA program, incidents of theft should be reported for theft of property which has a value of \$50 or more.	<i>Penal Code</i> , sections 484, 487, and 488
Vandalism	The malicious defacing, damaging, or destroying of property to school, student, or employee property. Reporting for purposes of the CSSA program shall be limited to incidents of vandalism that result in an economic loss of \$100 or more.	<i>Penal Code</i> , Section 594

(Revised 7/1/98)

APPENDIX B

- ▶ California Department of Education Safe Schools and Violence Prevention Office:
Safe Schools Grant
Programs, 1999-2000

California Department of Education Safe Schools and Violence Prevention Office

Safe Schools Grant Programs, 1999-2000

<i>Grant</i>	<i>Amount of Funding</i>	<i>Purpose</i>	<i>Eligible Applicants</i>	<i>When Application Is Available</i>	<i>Contact</i>
School Safety and Violence Prevention Act of 1999 (entitlement)	\$101 million statewide in 1999-2000; entitlement based on enrollment in grades 8–12, with guaranteed minimum for small school districts and counties	Provide safe schools and violence prevention programs for pupils.	Schools districts and county offices of education that have schools serving grades 8 through 12	Fall	Safe Schools and Violence Prevention Office (SSVPO) (916) 323-2183
Safe School Plan Implementation Grants (requires a safe school plan)	Up to \$5,000 each (plus district matching fund); up to 100 grants issued each year	Assist schools in implementing a portion of their safe school plan.	Schools	Fall	Steve Schwendimann (SSVPO) (916) 323-5277
Conflict Resolution and Youth Mediation Grant Program	\$10,000 or \$20,000 per district team; \$280,000 available per year	Provide training to school teams in conflict resolution.	School districts	February or March	Bonnie Williamson (SSVPO) (916) 324-6159 Arlene Shea Attorney General's Office (916) 324-7863
School Community Policing Partnership Grant Program	Up to \$325,000 each over a 3-year period; \$10 million available per year	Implement a school/ community/police collaborative to deal with school crime and safety issues.	School districts and county offices of education	Applications due March 1, 2000	Chuck Nichols (SSVPO) (916) 323-1026 Steve Jefferies Attorney General's Office (916) 324-7863
GRIP (Gang Risk Intervention Program)	Grants of \$100,000 per year; \$3 million available statewide each year	Intervene and prevent gang violence.	County offices of education	November	Chuck Nichols (SSVPO) (916) 323-1026
SB 1095: High-Risk First-Time Offender and Transitioning High-Risk Youth Programs	\$18 million for 1999-00 (five-year projects)	Design and implement early interventions to prevent chronic juvenile delinquency.	School districts and county offices of education	To be announced	Bill Lane (SSVPO) (916) 323-5721
Student Leadership Grant Program	Up to \$5,000 per grant; \$120,000 each year	Implement safe/healthy school projects that are designed and led by students.	High schools	September	Bonnie Williamson (SSVPO) (916) 324-6159
Title IV (IASA) Safe and Drug-Free Schools and Communities (Not a competitive grant)	Approximately \$4.02 per pupil (federal fund entitlement)	Initiate and maintain alcohol/drug/tobacco and violence prevention programs in schools.	County offices of education and school districts receive entitlements	June and October	Jerry Hardenburg (SSVPO) (916) 323-1025 Greg Wolfe, Healthy Kids Program Office (916) 657-3040

Additional information is available on the SSVPO homepage at <http://www.cde.ca.gov/spbranch/safety>.

APPENDIX C

- ▶ Crime Rates of School Districts with More Than 999 Students Enrolled, 1995–1999 (by Number of Incidents per 1,000 Students)

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.

Notes:

- Counties, school districts, and county offices of education with fewer than 1,000 students enrolled are not included on this table. See Appendix D for data on all local educational agencies.
- Because of space constraints, the following crimes, constituting less than 4.2 percent of the total crimes reported, are not included on this table: Bomb Threat (548), Destructive/Explosive Devices (585), Loitering/Trespassing (2,293), and Homicide (2).
- When drawing conclusions from individual rate changes, remember that improved reporting practices by some local educational agencies may have resulted in increases in their crime rates, which may not represent actual increases in crime.
